Krieger's Wholesale Trade List

Spring 1947

Wholesale Growers of
**SMALL FRUIT PLANTS AND
VEGETABLE ROOTS**

Krieger's Wholesale Nursery

Bridgman, Mich.
Telephone, Bridgman 22

Terms and Conditions

We offer usual terms to those of known responsibility. Where purchaser's credit responsibility is unknown to us, cash is required before shipment or reference with time for proper investigation. Orders to be sent C. O. D. should be accompanied with one-fourth cash.

5% discount and free boxing and packing allowed where cash accompanies order. No charge for packing carload orders in bulk.

2% discount for 10 days.

1% discount for 20 days.

Net 30 days from date of Invoice.

Any possible claims for rejection or deficiency must be made within ten days after arrival of stock. All shipments travel at the cost and risk of the purchaser except when otherwise agreed.

All prices subject to change without notice. Boxing at cost.

\$00 at 1000 rate.

If you do not see the items you want, write us. We list only stock that we grow and are not sold out of. We have many items in small quantity that we do not list. Most of our stock is dug in the Fall, therefore making it possible to give good service at any time.

All shipments leave the Nursery in good condition. Any injury to boxes and bales in transit should be noted upon the freight bill before acceptance at the dept. Our responsibility ends when shipments are accepted by the carrier.

Kindly advise when ordering, the method of shipment desired, otherwise we will use our best judgment in shipping the shortest and safest route. We deliver by truck within a reasonable distance.

All prices subject to prior sale and loss.

**HARDY NORTHERN GROWN
NURSERY STOCK**

To Our Customers:

The location of our Nursery is in the heart of the Southwest Michigan Fruit Belt. We are only a mile and a half from Lake Michigan, and 14 miles from the Indiana State Line. Lake Michigan is about 60 miles wide at this point. Northwest storms travel over more than 150 miles of water before they reach this area and are considerably moderated during sharp temperature changes during the winter months.

During the growing season, this large body of water has a big influence on our summer heat. This climatic condition is ideal for growing fruit and fruit plants. Wild berries of all types can be found growing everywhere in this area wherever the soil is not cultivated.

Bridgman has been known as a nursery center for many generations. Bridgman is the home of ten nurseries although its population is only about 1,000.

During the peak of the shipping season thousands of orders are shipped from this point daily which are handled with great efficiency. An express order, received early enough in the day so that it can be packed up, leaves here and clears the Chicago distributing point during the night and is on its way to you the following morning.

Stop in the next time you are in this area as we are only 80 miles from Chicago. The nursery business is our hobby and we would be pleased to tell you more about it.

Grape Vines

Five of the best Commercial and Garden Varieties.

CONCORD

One of the most popular and reliable grapes ever grown. Will do well in any type of soil and produce an abundance of fruit in any area where grapes can be grown. It has never had any winter injury in Michigan as long as it has been grown here. Still one of the best.

FREDONIA

The early new bluish, black grape that deserves more attention. Ripens about two weeks earlier than Concord. Very vigorous and bunches very compact. In the Southwestern Michigan fruit belt it is being planted extensively as a commercial variety. One of the best early varieties that has ever been known.

NIAGARA

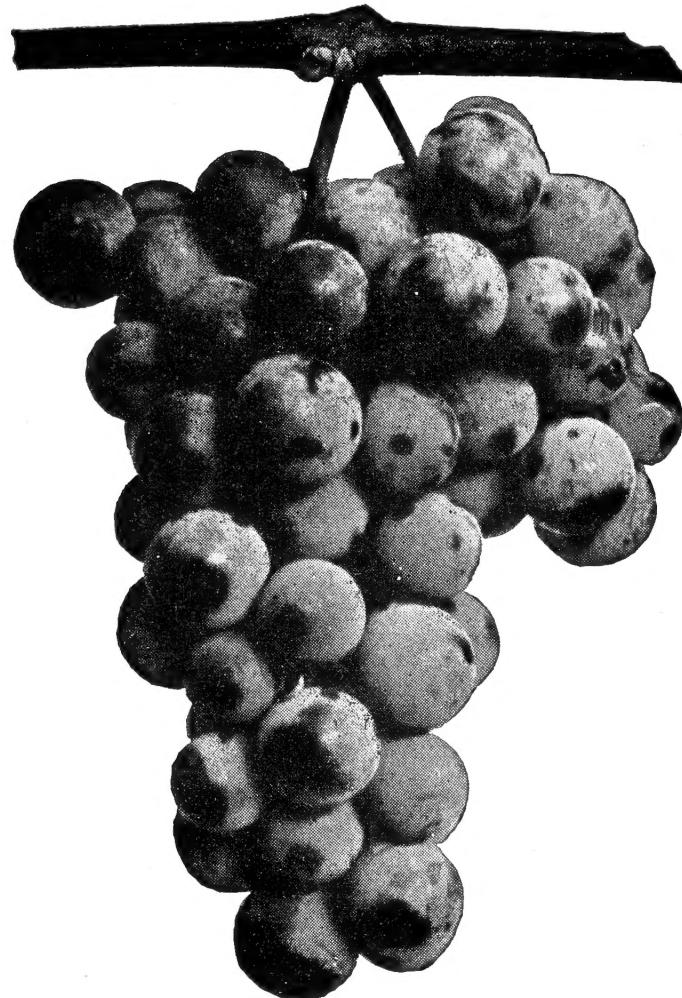

One of the outstanding white grapes and still the best. The only white grape of any commercial value. Grown extensively as a wine grape due to its heavy yields and high sugar content. A good commercial and home variety. Ripens a few days earlier than the Concord.

CATAWBA

The best of the red varieties. Fruit extra large and bunches compact and of good size. This is the only red grape that over a period of years has proven to be the best red variety for commercial planting. Also very good for the home garden.

DELAWARE

A small red variety produced in large clusters with an exceptional high dessert value. One of the sweetest grapes grown today.
